## /ABOUT

**MODERN DAY BABYLON** is first djent - groove - ambient Czech project. It was founded by **TOMAS RACLAVSKY** in the end of 2010 and started as a one-man project. Though today it performs as an instrumental trio who is past its succesful debut and is receiving unusual praises by critics.

Still in the time of preparations of the debut album, the project has been completed by conservatory graduates **VOJTECH SEMINSKY** (drums) and **PREMYSL KUNCICKY** (bass) joining **MDB**.

This three-member group has been stirring up the Czech progressive metal scene ever since. Some of the proofs are the Newcomer of the Year 2011 award and the Minialbum of the Year 2011 award, given by „Britva Awards“, a chart composed by some of the biggest names of Czech music media. Both awards went to the debut piece **THE MANIPULATION THEORY**.

The album launch was celebrated by supporting the American apostles of the same genre, band Periphery. Shortly after came the offer to perform at the United-Kingdom Tech-Fest which is about to take place in British Alton, July '12. MDB will play alongside other present formations, such as Tesseract or Monuments.
